

## Ductall U2 Industrial Vacuum Hose

The Plastiflex Ductall U2 Industrial Vacuum Hose is an all-plastic hose design utilized for air, liquid or material movement in both suction and gravity use applications. Engineered with a specialized all-plastic configuration, the Ductall U2 Industrial Vacuum Hose is the clear choice for solutions requiring lightweight, durability and outstanding flexibility.

*suction and gravity  
use applications*

*lightweight*

*outstanding flexibility*

*corrosion, wear,  
crush resistant*

*smooth internal wall*

*optimal flow performance*

*all plastic,  
closed wall profile*

Made from LDPE to provide the best in both corrosion resistance, wear and crush recovery, the Ductall U2 Industrial Vacuum Hose is a versatile hose solution chosen for its broad range of use. Suitable applications for Ductall U2 include commercial vacuum, industrial vacuum, car wash vacuum and carpet cleaning/extraction.

Developed with a closed wall profile to achieve an enhanced smooth internal wall, the Ductall U2 hose provides optimal flow performance in an all-plastic design. Complementing the closed wall profile design is a supporting cap structure which offers extra wear resistance against the harshest working environments.

Tested for a variety of light duty vacuum and industrial applications, the Ductall U2 is the preferred solution for wet or dry vacuum service with temperature ranges between -20F and 150F.

Available in multiple sizes, the Ductall U2 Industrial Vacuum Hose is the optimal product solution for light duty industrial and commercial vacuum requirements.
