

## HVac – Moderate Duty Portable Sanitation and Liquid Suction Hose

The Plastiflex HVac Moderate Duty Portable Sanitation and Liquid Suction Hose is designed for customers requiring economical suction hose performance for pumper truck evacuation, septic pumping, sewer cleaning, marine sanitation, wastewater and general industrial liquid suction service applications.. Featuring both a smooth inner and outer wall, the HVac Portable Sanitation and Liquid Suction Hose provides best in class flow performance in all service environments.

Using a proprietary LDPE resin blend, the HVac hose offers excellent crush and kink resistance within a tough outer shell.

Offering a high strength to weight ratio, the HVac hose is the best selection for applications that experience moderate volume use within various portable sanitation and liquid suction environments.

Additional features of the HVac hose is its excellent performance in both hot and cold environments along with optimal resistance to UV exposure.

Available in multiple sizes, the HVac Moderate Duty Portable Sanitation and Liquid Suction Hose is the cost effective, moderate service solution for various industry applications.
